Release Notes 3.98

These updates announce new features, enhancements, and some bug fixes that have been completed with recent releases of the Club Prophet software. The updates in the release notes are organized by product. Some products will not appear in the list because they did not receive a notable update. Club Prophet continually improves upon the products, but only significant updates are described in release notes.

Note: Check back here often to see links to help, directions, explanations and tips for the updates listed below!
